

Technical data sheet

SIGA-Wigluv® black

Updated on: July 05, 2017

Distributor: SIGA Cover, Inc.

Type of application: durably rainproof and windtight joints on facades and inclined roofs

Instructions: see manual

Composition: vapor semi-permeable special PO film, elastic, impermeable to water, UV-stable, can be exposed to the atmosphere for 12 months, With SIGA acrylic pressure sensitive adhesive

Packaging unit: 10 rolls / box

Characteristics:

		Standards	Units	Values
Dimensions	length / width		m / m feet / inch	40 / 0.06 131 / 2.4
Temperature resistance			°F °C	-40 °F to +212 °F -40 °C to +100 °C
Processing temperature			°F °C	from +14 °F from -10 °C
Atmospheric exposure				max. 12 months (unlimited behind cladding)
Water vapor transmission		ASTM E-96A	US perm	> 1.72
Water resistance		AATCC-127	cm	500
Ageing resistance	high permanent adhesive strength, non-drying and non-embrittling since without caoutchouc, resin or solvent, can reliably and durably absorb structural movements			
Suitability for storage	unlimited store in a cool, dry place in its original box
